Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 18 is confusing because it lists hydroxyl propanone as an aromatic alcohol.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6-17 and 19-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Hansen.

Hansen discloses, in example 5, a prepolymer composition made from isophorone diisocyanate and a polyether polyol having a molecular weight of about 3000 (see example 3) and terminated with an amino silane comprising aminopropyltrimethoxysilane (see SAS-1). The molecular weight of the prepolymer would be about 6000 (calculated from the equivalent weight of example 3). He adds a hindered phenol (Irganox 1010) having a molecular weight of less than 2000 in the amount of the claims. Example 5 comprises trimethoxyvinylsilane (A-171), which is the same moisture scavenger specified in the applicant's claims, and he adds other silanes (A-1120), which could function as adhesion promoters. Example 5 includes fillers of carbon black and calcium carbonate and he shows using this as a paint.

Claim 5 is objected to for depending on a rejected claim.
